

Breakout Group F

Efficacy and Crop Safety Data Development

1. Information identification

- Issue - efficacy-crop safety
 - where? - published? - website?
- Possible solution:
 - Refer to Group B
 - Collation of data sources / contacts – national databases
 - Registration status – was efficacy a registration requirement?
 - Research activities
- By whom?
 - NAFTA TWG, OECD –EGMU, EU Expert Group, CropLife

2. Scientific assessment principles

- Issue
 - extrapolation
 - scientific rationale
 - crop grouping (differences)- indicator crops / pests
 - zoning
- Possible solution:
 - matrix of requirements and management
 - short term (links to current documents)- long term (database development)
 - Global zoning – link with Residue work?- assess applicability to efficacy.
- By Whom?
 - OECD – RSG
 - IR-4

3.Liability

- Issue
 - waiver statements
 - depends on legal context
- Possible solution:
 - Refer to Group E
 - appropriate amount of data for mitigation of risk
- By Whom?

4. “Crop” grouping*

- Issue
 - variants with residues,- ornamentals,- pest complex,- crop variations,- limitations with herbicides
- Possible solution:
 - Efficacy – rep crop / pest representatives
 - Crop safety – rep crop/worse case scenario
 - * “Terminology” to differentiate from residues
 - Success linked to liability issues.
- By Whom?
 - monitor current EPPO activities

5. Data generation

- Issue
 - lack for minor uses
 - funding? sources?
 - resources / capability
 - formulation factors
- Possible solution:
 - linked to information sources – ref above
 - collate priority lists from all regions
 - identify joint R&D (link to Group D)
- By Whom?
 - minor use programs, grower organizations, governments

6. Tool Box / Armoury

- Issue
 - options
 - resistance management
- Possible solution:
 - Extend / encourage / identify joint reviews
 - workshares for minor uses
- By Whom?
 - OECD RSG, minor use programs, registrants
